EDUCATION

Viva Institute of Technology

May 2026

Bachelor of Engineering in Computer Science (AI & ML)

Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Machine Learning, Deep Learning, Big Data.

EXPERIENCE

4AM TECH

Nov 2025 – Jan 2026

Full Stack Developer Intern

Mumbai, India

- Developed and implemented **scalable application features**, enhancing overall usability and improving system performance across the platform.
- Built and integrated **RESTful APIs** to enable seamless and efficient communication between frontend and backend systems.
- Deployed the application on a **VPS server**, managing server setup, environment configuration, and production hosting.

TechnSure Private Limited

Nov 2024 – Jan 2025

Frontend Developer Intern

Remote

- Built **high-performance**, pixel-perfect user interfaces using Next.js and TypeScript, converting Figma designs into production-ready components.
- Collaborated with backend engineers to integrate REST APIs and handle data **efficiently** within the frontend application.
- Integrated and optimized **RESTful APIs**, ensuring secure data handling and seamless frontend-backend communication.
- Developed reusable and maintainable UI components, improving development efficiency and reducing code redundancy.

SKILLS

Programming Languages: Java, JavaScript/TypeScript, HTML/CSS.

Frameworks: Reactjs, Nextjs, Express.js, NestJs, React Native.

Other Technologies: Node.js, PostgreSQL, MongoDB, REST APIs, Tailwind CSS, Zustand, Git, Docker, Aws, CICD.

Development Practices: Software Development Life Cycle (SDLC), Agile / Scrum, Git-based collaboration.

PROJECTS

HireMe Pro | Next.js, TypeScript, Express.js, PostgreSQL, Socket.io, Gemini AI | [Git](#)

Feb 2026 – March 2026

- Built a hiring platform where recruiters create timed coding challenges and candidates solve them in a **live in-browser IDE** with **real-time preview** - no local setup required, enabling a frictionless assessment experience
- Integrated Gemini AI to auto-evaluate submissions on code quality, feature completeness, and requirements - cutting recruiter review time from **hours to seconds** with instant structured feedback.
- Built a real-time leaderboard with live rankings and per-candidate code review, automated session lifecycle (SCHEDULED → LIVE → ENDED) via cron jobs with auto-submit.

VendorHub | TypeScript, Nextjs, Expressjs, Postgres, AWS | [Git](#)

Apr 2025 – Jun 2025

- Built a multi-vendor eCommerce platform with vendor onboarding, product management, and real-time cart and order tracking across admin, vendor, and customer roles.
- Implemented JWT-based role access with Next.js, TypeScript, Prisma, and PostgreSQL for secure, scalable multi-role flows.
- Integrated Razorpay for secure checkout with server-side payment verification and order lifecycle management.
- Deployed on AWS (EC2, RDS, Amplify) with Docker Compose and CI/CD pipelines for automated releases.

Cityfix | React Native, JavaScript, MongoDB, Express.js | [Git](#)

Oct 2024 – Nov 2024

- Built CityFix, a community-focused platform that helps citizens report local issues, track resolutions, and actively participate in improving their neighborhoods.
- Enabled community-led sustainability efforts by adding features for project creation, voting, and collaborative mapping of problem areas and ongoing initiatives.
- Created a Clan system for local groups to organize events, manage members, and track fundraising for community projects.

ACHIEVEMENT

GNEC Hackathon: GNEC Hackathon: 3rd Place Winner out of 60+ Teams | React Native, Node.js, TypeScript, MongoDB

AI For Good Hackathon : Ranked Top 17 out of 100 Teams

CERTIFICATION

Full Stack Web Development

Career Essentials in Software Development by Microsoft and LinkedIn
